SECTION 4

SERVICE PROVISION: Technical description of the bid

TENDER PURPOSE AND EXPECTED RESULTS:

Bidders can submit an offer for one, several, or all lots. Offers must clearly show what lots are included. Offers must be submitted for the total quantity of each lot: offers submitted for a partial quantity of one lot may not be taken into consideration by NRC. NRC are requesting financial and technical proposals for both Microwave Internet and Wireless Point to Point. The type of internet required varies from office to office. NRC also wish to contract a VSAT back up for each of its main offices in Afghanistan.

NRC may award all LOTS to a single bidder or award each LOT to a different bidder. This decision will be made by a procurement committee based on a technical and financial evaluation of all bids received. Bids submitted must therefore be valid even if your company is selected for just 1 of the LOTS.

Note that NRC may increase or decrease the bandwidth in any of its offices during the course of a contract. The number of Mbps per office listed in the below table is an estimate only and may vary during the course of the contract. It is expected that suppliers quote a price that can be maintained regardless of the quantity of Mbps required by NRC. NRC will pay for the Mbps received.
